

DLR - CONFERENCE ON CLIMATE CHANGE 2018

Category - International event - Duration: 3 days

Climate-friendly

B 247 Points (135 kg CO₂e/pax)
 (168/200 Pts. Carbon Footprint & 79/100 Pts. Questionnaire)

Scope	CO ₂ e-emissions
Mobility	34.175 t
Location	0.854 t
Overnight stays	1.859 t
Catering	0.533 t
Print	0.559 t
Other	0.156 t
<hr/>	
	38.137 t CO ₂ e

Climate-damaging

For your event „CONFERENCE ON CLIMATE CHANGE 2018“ in Cologne, from 17th March – 19th March 2018, CO₂OL calculated total emissions amounting to 38.137 t CO₂-equ. based on a validated methodology. This is equivalent to an emission value of around 135 kg CO₂-equ. per participant per day. The event-specific benchmark value is composed of this characteristic value and the results of the evaluation of a catalogue of criteria with questions on environmental factors that cannot be measured in CO₂-equivalents. Your event will be compared with particularly climate-friendly and climate-damaging events of the same category. For this purpose, events already analysed by CO₂OL are used anonymously with worst or best-case scenarios for benchmark purposes.
